onCore m750
Embedded Print Controller for the Minolta Di750

ONCORE

PageScope Light with onCore

Finally. A cost-effective print controller that's actually effective.

The onCore m750 embedded print controller gives you everything you need to print digitally using your Minolta Di750 digital copier. And onCore offers a full set of features for printing, making it a truly cost-effective solution.
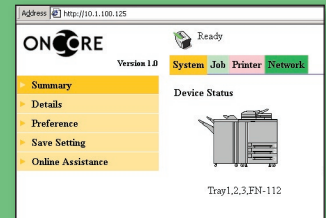

Your PC

Minolta Di750 with onCore

Print right from your desktop - you have full control over all finishing options, as well as features like duplex, watermarks, and booklet making. onCore m750 also lets you scan from your copier.

Using the PageScope Light web tool, you can monitor and control your printers with ease. And onCore doesn't require a dedicated server, keeping your costs low and your installation simple.

Easy Installation
No dedicated server needed. Start printing immediately with ease.

Scanning
Increase your copier's value by using it as a document scanner. Scanning is included with onCore.

Finishing Options
Supports all Di750 finishers, including Punch Kit and Cover Inserter.

Printer Status and Monitor
With the PageScope Light tool, you can monitor and control your printer from anywhere on the network.

Job Tracking and Accounting
Assign account numbers to print jobs for easy tracking.

onCore

digital printing simplified.
