ColorPASS-Z60

achieve extraordinary
color printing
capabilities

productivity

speed

flexibility

accuracy

network

A new generation. A new architecture. A new combination of high-speed processing, photographic-quality color, and productivity-enhancing software. The Canon ColorPASS-Z60 color server has arrived. And its advanced capabilities will leave you with a new definition of high performance.

Connected to Canon's CLC 1100 Series Color Laser Copiers, the ColorPASS-Z60 exceeds all previous standards for network communications and color control—delivering unprecedented mid-range performance.

At the heart of the ColorPASS-Z60 is new technology—a high-speed 600MHz Intel® Pentium III processor. Featuring 256MB of RAM, a 9.1GB Hard Drive, Adobe® PostScript®3, and state-of-the-art ECT "lossless image" Compression, it provides the needed muscle to execute the production-intensive tasks of today's most demanding graphic arts and Print-for-Pay environments.

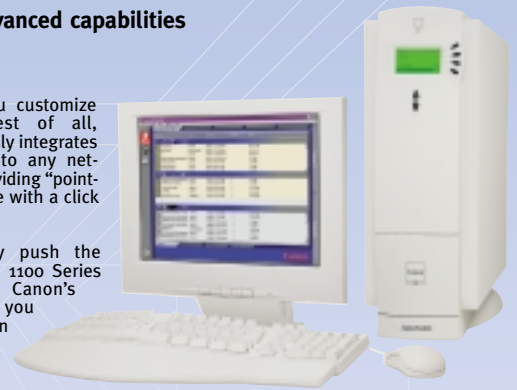

New PowerWise™ architecture maximizes print

engine speeds. ColorWise® 2.0, the first open color management system with ICC Profile Manager, gives users the most consistent, accurate color-matching available. For experts, a new suite of ColorWise Pro Tools offers unparalleled accuracy in proofing and comping. And for novices, the out-of-the-box color quality is truly amazing.

Job management is especially easy, whether accessed centrally from the Command WorkStation™, WebTools™, or even from new Fiery Link™, allowing you to monitor any print job, from any workstation. DocBuilder Pro™ makes it easy to preview, merge, edit, and impose documents before the RIP process; improving workflow while FreeForm™ variable

data printing lets you customize documents. And best of all, NetWise™ 2.0 seamlessly integrates the ColorPASS-Z60 into any network environment, providing "point-and-print" convenience with a click of the mouse.

So, if you routinely push the envelope on your CLC 1100 Series copier, why not let Canon's ColorPASS-Z60 take you to the next frontier in productivity?

*ColorPASS-Z60 shown with optional Advanced Controller Interface Kit.
